DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species A claims 1-2,11 in the reply filed on 7/3/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2,11 are rejected under 35 U.S.C. 102(b) as being anticipated by Jenkinson (US 4469136).

Regarding claim 1, Jenkinson in figures 1-3, discloses an armature packet for an electric motor, having a plurality of armature laminations (11-12), in each of which a plurality of winding slots for receiving an armature winding (13) are embodied, and the winding slots of adjacent armature laminations are located in alignment with one another and form a conduit, wherein the winding slots, associated with one conduit, of different armature laminations have different geometries.

Regarding claim 2, Jenkinson in figures 1-3, discloses the geometry of every other winding slot of one conduit has a larger cross section than the winding slot of the adjacent armature lamination.

Art Unit: 2834

Regarding claim 11, Jenkinson in figures 1-3, discloses the cross section of each winding slot has a constriction on the outer end, in particular with two undercuts.
